

WE ARE NOT STANDING DOWN ... We are standing UP!

Now is when we are needed most and we are prepared to meet the challenge.

Customers & Team Members:

Despite the progression of the Coronavirus and the disruptions it's causing, Space Management and our entire Team of Level One Certified Cleaning for Health Technicians remain committed to doing all we can to continue to deliver the professional service you expect. Please do not hesitate to communicate with us as you normally would.

We understand our role as ESSENTIAL PERSONNEL. It is our mission to remain on the front lines in all our client facilities working to defeat the spread of the Covid-19 virus. We know the importance of deep cleaning and sanitizing the high human contact surfaces (touch points) throughout the buildings we maintain.

In the event of an office or business closure, our infrastructure is set up to continue to follow through with extra deep cleaning processes while areas or structures are temporarily unoccupied. There is much to do and we are on it.

We have the PPE (personal protective Equipment) supplies, training and safety protocols in place to protect our teams while they work to clean and sanitize your work environments with a EPA registered Hospital grade virucide disinfectant solution.

To address the evolving needs of our clients who remain operational, we are working to supply Infection Prevention@Work kits and instruction posters to all who request them. This Program is highly successful especially when everyone participates.

We are actively monitoring the updates provided by the United States Centers for Disease Control and Prevention (CDC), World Health Organization (WHO), and our state/local government agencies to stay on top of the very latest recommendations and protocols.

We are proud of the dedication and responsiveness our technicians continue to demonstrate during this pandemic. We stand ready to help and address any questions or concerns. Please do not hesitate to call me personally or any member of our management team.
